An simple but interesting and relaxing puzzle\strategy game. Well worth the price.. I like this but there needs to be a volume control button.. Don't buy at all, not even on a discount.

. This has a free flash game feeling to it and you will finish it within about an hour if you keep at it long enough.

Not worth the cash is my final verdict.. R.O.O.T.S is a fairly simple strategy game where you grow trees, and attempt to eliminate the enemy trees. Despite its simplicity, it is engaging and fun, though I think a multiplayer mode would improve it..

Played an hour roughly so far and enjoyed it still working out the mechanics. for the price in my opinion you can't go wrong and is a pretty looking game.. This game is dumb !!! at first I liked it. the concept is good but some levels are super easy while others are impossible ???

I guess that would come down to poor level design? as much as I have played I can not seem to fully grasp the mechanics of it? how do I attack strongly or defend all my combinations have failed ???? having more points ? nope? have all of them linked ? nope. how they are linked. nope still un effected? I want to like this game but too many frustrations Not to mention so levels with totally random worms floating around ??? that's not a Puzzle or strategy to that it is just messy and confusing for no reason??? I have even looked up how to beat some of the levels I could not beat but what I saw in vids never ever worked for me no matter what I tried or how fast. even got to the point where I was almost winning but still lost. WOULD REALLY like to now how this game is suppose to work. what allows you exactly to have a take over ??? Cuz it never teaches you that ????
